

# SCOPE Retrofit Measure Analysis Report

Comprehensive Energy and Financial Analysis

## Executive Summary

This report compares total site energy consumption and operational costs between baseline and all applied renovation scenarios from CSV results. The construction cost data is from 2026 RSMeans Database. Since RSMeans Database is proprietary, users can adopt customized cost dataset when needed.

## Building Information

- Weather File: USA\_NY\_Buffalo-Greater.Buffalo.Intl.AP.725280\_TMY3.epw
- Building Name: SmallOffice
- Building Location: Buffalo, NY
- Total Floor Area: 511 m<sup>2</sup>

## Renovation Details by Scenario

| Scenario   | Renovation Type             | Renovation Details                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Baseline   | baseline                    | Baseline (no envelope renovation)                                                                                                                                                                                                                                                                                                                                                                                                             |

Annual Energy Analysis

| Scenario   | Metric                 | Baseline | Renovation | Delta | Savings % |
|------------|------------------------|----------|------------|-------|-----------|
| Scenario 1 | Total Site Energy (GJ) | 440.31   | 402.76     | 37.55 | 8.53%     |
| Scenario 2 | Total Site Energy (GJ) | 440.31   | 388.03     | 52.28 | 11.87%    |
| Scenario 3 | Total Site Energy (GJ) | 440.31   | 385.64     | 54.67 | 12.42%    |

Key Performance Metrics

**Operational Cost Saving (Scenario - Baseline) (\$/yr) Comparison**

|            |             |          |
|------------|-------------|----------|
| Baseline   | <div></div> | \$18,286 |
| Scenario 3 | <div></div> | \$17,024 |

■ Baseline ■ Scenario 3

Max saving: **\$-1,262 (-6.90%)**

**Total Site Energy Saving (Scenario - Baseline) (GJ/yr) Comparison**

|            |             |     |
|------------|-------------|-----|
| Baseline   | <div></div> | 440 |
| Scenario 3 | <div></div> | 386 |

■ Baseline ■ Scenario 3

Max saving: **55 GJ (12%)**

Min Retrofit Construction Cost

**\$19,102**

Scenario 1

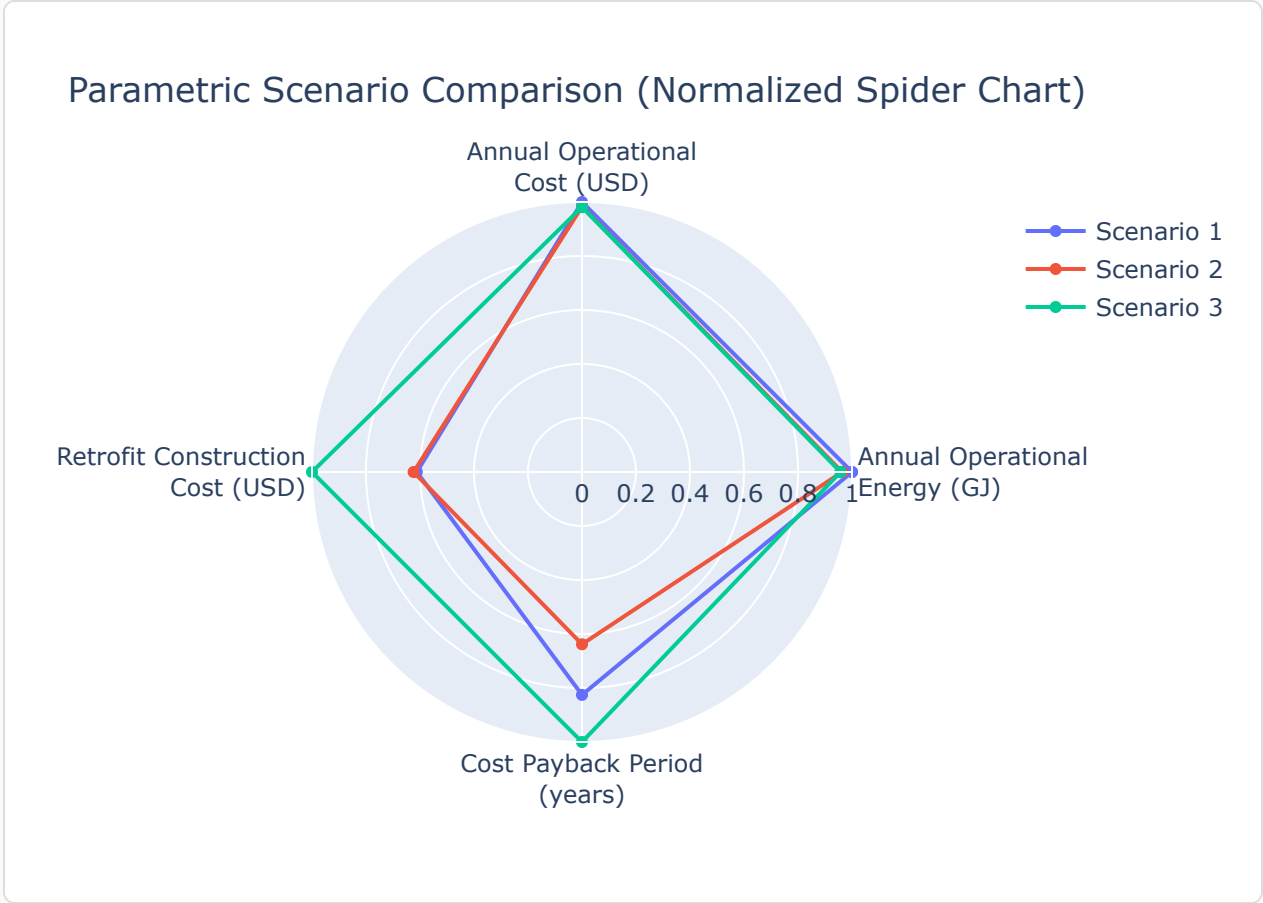

Lowest Retrofit Cost Payback Period

**16 years**

Scenario 2

Comparative Visualizations between Renovation Scenarios

Spider Chart Visualization

Payback Period of the Retrofit

Cost Payback Period

Payback = retrofit construction cost / abs(Operational Cost Saving (Scenario - Baseline) (\$/yr)).

|            |             |        |
|------------|-------------|--------|
| Scenario 1 | <div></div> | 20 yrs |
| Scenario 2 | <div></div> | 16 yrs |
| Scenario 3 | <div></div> | 25 yrs |

Material List

Material properties and consumption by renovation scenario. Missing values are shown as N/A.

| Scenario   | Component             | Material name                  | Volume (m <sup>3</sup> ) | Area (m <sup>2</sup> ) | Thickness (m) | Length (m) | Thermal Conductivity (W/m·K) | Density (kg/m <sup>3</sup> ) | Product Lifetime (years) |
|------------|-----------------------|--------------------------------|--------------------------|------------------------|---------------|------------|------------------------------|------------------------------|--------------------------|
| Scenario 1 | Wall insulation       | Blown Mineral Wool             | 16                       | 282                    | N/A           | N/A        | 0.03                         | 90                           | 30                       |
| Scenario 1 | Roof insulation       | Blown Mineral Wool             | 144                      | 599                    | 0.24          | N/A        | 0.03                         | 90                           | 30                       |

## Result Summary

Per-scenario breakdown: left chart shows retrofit construction cost contribution by measure, right chart shows total site energy by fuel type (electricity, natural gas, and other). Water is excluded from energy breakdown.

### Scenario 1

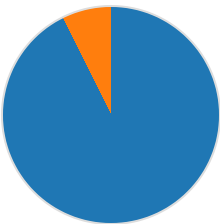

Cost breakdown by retrofit measure

- Wall: \$576 (3.0%)
- Roof: \$5,021 (26.3%)
- Window: \$13,082 (68.5%)
- Door: \$424 (2.2%)

Total: \$19,102

Total Site Energy Breakdown (GJ)

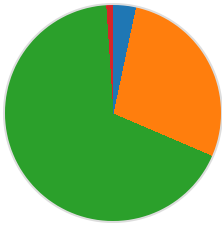

- Electricity: 373.07 GJ (92.6%)
- Natural Gas: 29.69 GJ (7.4%)

Total: 402.76 GJ

### Scenario 2

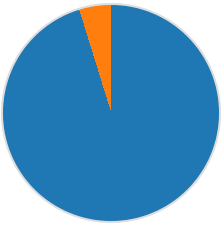

Cost breakdown by retrofit measure

- Wall: \$648 (3.3%)
- Roof: \$5,477 (28.1%)
- Window: \$13,141 (67.5%)
- Door: \$208 (1.1%)

Total: \$19,474

Total Site Energy Breakdown (GJ)

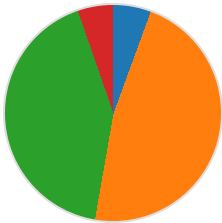

- Electricity: 369.41 GJ (95.2%)
- Natural Gas: 18.62 GJ (4.8%)

Total: 388.03 GJ

Scenario 3

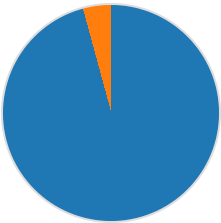

Cost breakdown by retrofit measure

- Wall: \$1,742 (5.6%)
- Roof: \$14,727 (47.2%)
- Window: \$13,088 (41.9%)
- Door: \$1,663 (5.3%)

Total: \$31,220

Total Site Energy Breakdown (GJ)

- Electricity: 369.34 GJ (95.8%)
- Natural Gas: 16.30 GJ (4.2%)

Total: 385.64 GJ

| Scenario   | Retrofit Construction Cost (USD) | Annual Operational Cost (USD) | Total Site Energy (GJ) |
|------------|----------------------------------|-------------------------------|------------------------|
| Baseline   | \$0.00                           | \$18,286                      | 440.31                 |
| Scenario 1 | \$19,102                         | \$17,351                      | 402.76                 |
| Scenario 2 | \$19,474                         | \$17,052                      | 388.03                 |

|            |          |          |        |
|------------|----------|----------|--------|
| Scenario 3 | \$31,220 | \$17,024 | 385.64 |
|------------|----------|----------|--------|
